

# TRESTAD LASER AB

## – Company policy –

*Quality, environment and work environment*

Our business shall always fulfill the customers' requirements and all laws and applicable regulatory demands. Our strategy is to operate within all industrial areas to always be available as suppliers to high demand sectors.

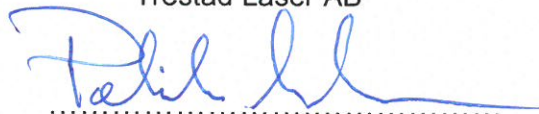

We will achieve this through continuous information, education, quality and environmental commitment. Our ambition is that every Trestad Laser AB employee shall contribute to a healthy work environment and to be aware of their quality and environmental obligations.

Trestad Laser AB will perform work within most industrial sectors but shall aim for a leading position for contracts and subcontracts within the aircraft, spacecraft and gas turbine markets.

With continuous improvements, energy efficient ways of working, a life cycle wholistic approach and being aware of the global market we will ensure and improve our competitiveness. This will lead to increased business success for us and our customers.
